Additional Information:

Please use the information above to guide your preparation for the lessons which take place after the PPEs. The lessons above will begin in the week commencing 12th March 2018 which marks the last 8 weeks before the first Science exam.

Suitable preparation would include using the revision guide to go over previous content and practise answering exam questions which are featured in the book

Key for terms used above:

Diagnosis = A short test of approximately 20-30 marks to identify weaknesses within topics

Therapy = A combination of teacher-led and student-led revision activities of weaker areas

Test = A short test to check progress and demonstrate improvements since therapy

Cornell notes = a revision technique which asks students to complete a series of questions organised as a grid to highlight key terms and then summarise each page
